Project Management Structure

Our six-stage process enables complete project control by clearly identifying the specific steps required to take the initial design concept through to full construction - on time and within your budget.

1

Project Conception

- Client brief
- Preliminary space planning
- Works identification
- Works planning
- Budget estimate

2

Documentation

- Scaled 2D CAD drawings
- Specifications
- Sustainable design practices
- Colour schemes
- 3D Visualisation images

3

Authorities

- Certification authority engagement
- Owner approvals
- Local council application
- Building code of Australia & Australian Standards compliance

4

Site installation

- OH&S regulation
- Insurance coverage
- Construction management
- Budget control
- Quality control

5

Completion

- Cleaning
- Final detailing & approval
- Occupation certification
- As built documentation

6

Ongoing Maintenance

- 12 months warranty on all our workmanship
- Continual relationship to service all of your future facilities needs as you grow
